FOR IMMEDIATE RELEASE

METALAST and Dipsol of America Form Distribution Partnership

Minden, Nevada, January 9, 2012: METALAST International and Dipsol of America have entered into a formal distribution partnership. Since 1989, Dipsol of America has manufactured and distributed many types of metal finishing products including zinc, zinc alloys, topcoats, phosphates and a variety of chromating chemicals. Headquartered in Livonia, Michigan, Dipsol of America operates from a state-of-the-art facility, which includes a variety of testing and analytical equipment as well as highly trained and educated technical and support staff.

As a result of the partnership, Dipsol of America will be able to provide aluminum anodizing chemicals including METALAST AA-200 additive as well as pre and post treatment chemicals, previously not part of their product offerings. In addition, Dipsol of America will add to its environmentally friendly chromating product line to now include METALAST TCP-HF, METALAST TCP-NP, and METALAST OCP. Tarek Nahlwai, Dipsol of America President stated “We at Dipsol of America are pleased to serve our OEM and customers with a broad range of high technology products that exceed their requirements. Dipsol has immediate access to METALAST products. Our agreement with METALAST not only helps OEM and customers to achieve success today, but also seeks to provide them with a solid foundation for tomorrow.”

The partnership adds to METALAST’s growing network of distributors that are able to meet customer demands throughout North America and beyond. Gregory Semas, METALAST Senior Vice President stated, “We are extremely pleased and excited to partner with such a well recognized and quality company like Dipsol of America. With the growing number of approvals and specifications calling out
