

“Our niche is service. We just happen to be in the plating industry.”

At FORESIGHT FINISHING, we understand the time and effort that goes into manufacturing, so you can expect more from us:

We'll identify critical surfaces, radiuses, tolerances, surface finishes, tight tolerance, threads, and more – prior to plating.

We'll review your PO thoroughly, won't damage or lose your parts, and we'll package them correctly.

You'll get consistent pricing and no surprises.

PLATING OF PRECIOUS & NON-PRECIOUS METALS

- Selective plating for mil spec and pc tail contacts. Low cost tooling available for custom contacts.
- Copper, electrolytic and electroless nickel, bright tin and gold plating
- Industries: Aerospace, Defense, Medical, Electronic, major OEMs
- Traditional barrel plating and vibratory plating
- Tight plating distribution ratios for critical tolerances
- Plating of small, fragile components with deep recesses and blind holes
- All orders are processed with Nadcap certs regardless of whether they are needed, eliminating the premiums that generally accompany this certification

**EXPEDITING
OF MISSION
CRITICAL COMPONENTS!**

We can have your plated parts back to you same day, anywhere in the country. This as a courtesy – not an opportunity to charge you more!
